“EMPOWER YOUR BUSINESS”

DYNAMIC PERFORMANCE

PMSM + E-axle, peak power of 100kW, peak torque of 270N·m, 0~50km/h acceleration time of 7.4s, maximum gradeability of more than 20%.

SAFETY PERFORMANCE

① Matched with new generation of CATL battery, safe and reliable, completed with a more than 300,000km of vehicle reliability verification, low risk of thermal runaway.
② Driving safety: equipped with ABS, optional driver and co-driver airbags, to provide driving protection.

RANGE

63.75kW·h battery with high energy density, long lifetime, long driving range and good low-temperature performance, range up to 175km, DC charging replenishment takes only 1 hour.

PASSING CAPACITY

Passing capacity: Vehicle body length of 4.9m and height of 2.1m, minimum turning radius of 5.25m, can easily enter and exit the basement, drive in narrow and crowded road conditions, for the convenience of last-mile of urban transportation.

MODIFICATION PERFORMANCE

Modification performance: Developed and designed for the urban short-distance logistics and transportation, equipped with rated/peak power of 20/40kW power supply interface for superstructure, can be used for urban logistics and distribution, garbage collection, refrigerated transportation and other scenarios.
